Course Name: Mobile Computing

Experiment 2: Mobile Station UI Design Using Figma

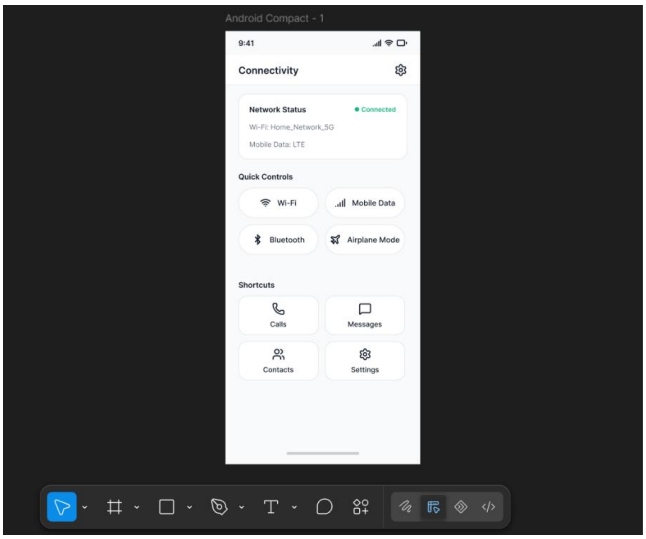

Aim

To design a user interface prototype for a mobile station using Figma, focusing on connectivity and convenience features such as Wi-Fi, mobile data, Bluetooth, calls, messages, and network settings.

Procedure

1. Open Figma and create a new design file.
2. Create a smartphone frame using a suitable mobile device preset.
3. Design the home screen with network status, signal strength, and battery level.
4. Add buttons for Wi-Fi, mobile data, Bluetooth, and airplane mode.
5. Add shortcuts for calls, messages, contacts, and settings.
6. Use suitable colors, icons, and rounded buttons to make the interface user-friendly.
7. Open the Prototype tab and connect the buttons to different screens or interactive states.
8. Test the prototype using Present mode to verify the interactions.

Output:

Result:A basic cellular system diagram was created successfully using Figma.
